

In these spiritually potent times,  
It is wise for us to realize  
That we must Imagine – see, feel and act upon –  
The true and shining ideal of the diverse Beings  
Which we wish to live with and shepherd in abundance.  
This means, not only in our own country, but across this vast living globe.

We must realize that our Thinking  
Is luminously potent and manifestly formative,  
And that our feelings have generative power -  
Which when combined can become a healing force for the good.  
We must understand that our willingness to act  
Is a divine gift with a purpose –  
The creating of a fiery enthusiastic interest in those around us.  
It is from this fertile ground of active caring  
That we will find our existence alive with Love and Freedom.

We are given minds, not to blindly parrot,  
But to see the possibilities we hold ourselves back from.  
We have been given our capacity to feel not only our own suffering,  
But also the pain of a divided world around us.  
We have arms and legs, but behind them is a divine intent -  
To embrace the ‘others’ in our lives with a healing and compassionate understanding.

We stand at this potent moment  
In which the divine world surrounding and penetrating us all  
Is fervently and reverently awaiting the awakening of the heart of humanity!  
See it – Find yourselves in ‘the other’.  
Feel it – the warmth of love we ourselves desire, by giving it freely to others.  
Act like it – so that this reality IS.
